### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michael Soldner on 7/7/04.

The application has been amended as follows: **Claim 20 line 1 delete "Claim 19" and replace with --Claim 14--.**

2. The following is an examiner's statement of reasons for allowance: None of the prior art of record either alone or in combination discloses the combination in the independent claims specifically:

- Regarding claim 14, the overmold formed of a second thermoplastic material that adheres to part of the core and first circuit element.
- Regarding claim 30, forming the overmold of a second thermoplastic material including heating and injecting then coupled to an implantable medical device.
- Regarding claim 49, heating the core prior to injecting the thermoplastic.

Regarding claim 50, a core element with ridges that are melted during the formation of the overmold structure.

- Regarding claim 51, forming of the overmold includes coupling a coupling member of the mold to the core prior to injection.
- Regarding claim 52, forming of the overmold includes coupling a coupling member of the mold to the circuit.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Collumeau teaches a circuit formed in a core but no overmold. Stobie et al teaches a method for making an implantable medical device with a circuit in a core but no overmold formed of a second thermoplastic material. Tiffany III teaches a method for making circuit in a core and an overmold but no coupling member.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael C. Zarroli whose telephone number is 571-272-2101. The examiner can normally be reached on 7:30 to 3:30 M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lynne Feild can be reached on (571) 272-2800 ext 39. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
